

PNEUMATIC OLIVE & NUT HARVESTERS

PNEUMATIC OLIVE HARVESTER

OLISTAR TUONO

Classic style air powered harvester. A shortened piston stroke increases the beats per minute to 1800 and reduces the air usage from 200 to 150 litres per minute. Fitted to a patented Campagnola extension pole, the Tuono can harvest over 4m off the ground.

 TUONO

 1000g  150L/min  95psi

PNEUMATIC OLIVE HARVESTER

GOLIA

This new design incorporates splayed fingers which move side to side. The Golia can run at a very low pressure - this slows movement making the Golia suitable for harvesting olives that easily bruise. Fitted to a patented Campagnola extension pole, the Tuono can harvest over 4m off the ground.

 GOLIA

 1000g  200L/min  58-95psi

PNEUMATIC NUT HARVESTER & THINNER

HOOKSHAKER

The Campagnola pneumatic fruit thinning & harvesting hook shaker is practical and effective in thinning various kinds of fruit & blossom. These include peaches & apricots but the hook shaker is especially effective at pistachio nut and blueberry harvesting.

 HOOKSHAKER

 800g  200L/min  95psi

PNEUMATIC PRUNER & HARVESTER

EXTENSION POLES

Telescopic and fixed length poles from Campagnola.

The Campagnola AH-T series, telescopic extension poles are made from anodized aluminium, rendering them light yet incredibly strong and have a quick locking clamp for rapid length adjustment. The thread size adapts directly to the entire range of Campagnola pneumatic chain saws and harvesters but can also be used in conjunction with Campagnola pneumatic secateurs by means of an easily fitted adaptor.

F2-Valve
Direct flow air valves can be used on fixed length extensions to provide continuous air flow without using an operating lever.
